PROFESSIONAL SUMMARY

B.Tech Computer Science and Engineering student specializing in Artificial Intelligence & Machine Learning, with a strong interest in Java Backend Development, AI/ML, and Software Engineering. Experienced in building web-based and AI-powered projects using Java, Python, JavaScript, and modern development tools. Currently strengthening expertise in Data Structures & Algorithms, Spring Boot, REST APIs, databases, and machine learning. Passionate about solving real-world problems through scalable and practical software solutions.

SKILLS

Java • Spring Boot • Hibernate • PostgreSQL • C++ • Git & GitHub • DSA • Team Leadership • Hibernate • Public Speaking • Problem Solving

Education

AUGUST 2025 – AUGUST 2029

Bachelor of Technology-CSE(AI & ML)

Open Source & Development

- Contributing to open-source software like Gssoc.
- Exploring programs such as Google Summer of Code (GSoC) and other open-source initiatives.

Projects

- **StudyCanvas** : Participated in a hackathon focused on developing technology-driven solutions. Collaborated with team members to design and develop the StudyCanvas platform. Contributed to application development, feature implementation, and project presentation. Gained practical experience in teamwork, Git/GitHub and rapid product development.
- **Edugram** — Educational Short-Video Platform
- **SmartClass(Working)** — AI-Powered Student Attendance System

Tech Stack: Python, Computer Vision, Machine Learning, OpenCV, Flask/FastAPI, HTML, CSS, JavaScript, PostgreSQL

Developed an AI-powered attendance management system using facial recognition to automatically identify students.
